

REDMOND 10 FINE

Nature has it right™

10 FINE

PREMIUM MINERAL SA

PRODUCT BRIEF

Redmond 10 Fine contains our full spectrum of sea minerals and is a great place to start for any mineral program. 10 Fine is for all classes of livestock.

Redmond's minerals are delicious and geologically unique. Harvested from an ancient seabed in central Utah, our products contain the best nature has to offer. The minerals in REDMOND 10 FINE mirror the mineral profile found in healthy livestock blood, both in type and concentration. Our salt excels at replenishing those minerals essential health so your animals can thrive.

TALKING POINTS

REDUCE COSTS ON CUSTOM MINERAL MIXES

10 Fine has many trace minerals that livestock need. If your animals and soil experience mineral deficiencies, we either custom fortify your minerals to match your exact needs. For animals on deficient feeds or forages, we recommended our next tier products: (Tier 2) Selenium 90, or (Tier 3) species fortified mixes Beef Mineral, Sheep Mineral, and Goat Mineral.

NO CHEMICAL PROCESSING

Redmond 10 Fine is unrefined, OMRI Listed®, and contains 0% synthetic chemicals. Whether your approach is organic or conventional, 10 Fine can help you get back to what you love about raising animals.

PREFERRED BY LIVESTOCK

Animals instinctively crave salt that has naturally occurring trace minerals. Try it in your herd: put any salt or mineral next to Redmond 10 Fine and see which one your animals choose.

HOW DO I USE IT?

Offer free choice year round in loose minerals or in block form. You can also mix with feed rations.

We recommend combining Redmond 10 Fine with Redmond Conditioner to take your mineral program to the next level

WHY IS REDMOND BETTER THAN HEAVY MINERAL MIXES?

Some mineral programs offer heavy doses of minerals mixed with a small amount of salt. Unfortunately heavy mineral supplements easily tip the scales too far in one direction or another. When it comes to minerals, any imbalance is unhealthy--too little is just as bad as too much. Plus, some minerals taste bitter, so heavy mineral supplements with low salt are much less palatable to your animals.
