

REDMOND 10 FINE WITH GARLIC

PRODUCT BRIEF

Redmond 10 Fine with Garlic combines our full spectrum of sea minerals with the pest repelling power of garlic.

REDMOND SEA MINERALS

Harvested from our ancient sea deposit in central Utah, our mineral salt is geologically unique and contains:

- 4 electrolyte salts: sodium chloride, magnesium chloride, calcium chloride, and potassium chloride
- 60 + trace minerals

BIO-IDENTICAL GARLIC OIL

The bio-identical garlic oil in Redmond 10 Fine with Garlic is 12x more potent than garlic powder. This high quality compound is highly bio-available and offers longer stability and shelf life than other forms of garlic.

TALKING POINTS

NATURAL PEST PREVENTION

Garlic metabolizes through the breath and hide to naturally repels biting pests without loosing efficacy like other pest relief products.

BOOST PRODUCTION/SAVE MONEY

A study conducted by the University of Arkansas, Fayetteville found that “in the United States cattle production losses due to horn flies have ranged from \$730 to \$876 million.” Whether your operation relies on cattle weight or milk production, horn flies alone can cause huge losses. Investing in fly repellent efforts will lead to beneficial weight gain, boost milk production, and increase the productivity of your operation.

WON'T LOSE EFFICACY

Livestock don't develop a resistance to garlic, like they do with other chemical pest treatments that have to be rotated in order to keep working. So you can ditch your repellent charts with lists of active ingredients and calendars, and get back to what you really love about raising animals.

STUDIES

FIELD PROVEN BY EXPERTS

The Saskatchewan Department of Agriculture conducted an extensive field test on the effectiveness of garlic mineral salt for fly control. 3 herds, consisting of 150 cow/calf pairs each, were each given mineral salt, with 1 herd being fed garlic mineral salt.

STUDY BY THE SASKATCHEWAN MINISTRY OF AGRICULTURE

Garlic mineral salt supplements reduced fly counts by about 55% and significantly reduced cattle avoidance behaviors

PRODUCT FAQ'S

HOW DO I USE IT?

Offer free choice year round. Available in loose minerals or in block form. You can also mix with feed rations.

We recommend combining Redmond 10 Fine with Garlic with Redmond Conditioner to take your mineral program to the next level

[Learn more about Redmond Conditioner](#)

WILL IT TAINT MILK OR MEAT FLAVOR?

We get this question all of the time. No, we have never had anyone complain about a garlicky flavor in any animal that consumes 10 Fine with Garlic. Garlic compounds are metabolized through the skin and breath, directing the pest repelling power to their faces and hide, not to milk or muscle stores.
