## INGREDIENTS

Unrefined mineral sea salt, molasses, sodium selenite, zinc oxide, manganous oxide, copper sulfate, cobalt carbonate, ethylenediamine dihydriodide (EDDI)

## TESTIMONIALS

“ For us, mineral is the biggest health factor in Bison, because if they get low on minerals you're going to have all kinds of issues. Since we've been getting this mineral into them, we've had next to no health issues.  
-Nolan M. (Silver Creek Bison, Manitoba)

We have a large herd of bison and beef in the Peace River District of Alberta. Our problem was a low conception rate of 63% and a lack of selenium in our area. Redmond made us a custom mix of salt and mineral for our bison. Bison 90 was born! After 2 years a tremendous improvement in conception rate of 80% was obtained. Our cows are addicted to Redmond!  
-Delano T. (Spirit River, Alberta)

## FREQUENTLY ASKED QUESTIONS

### WHY DO BISON NEED MINERAL SUPPLEMENTATION?

Bison no longer have unlimited access to millions of open acres to increase the mineral diversity in their diet. Supplementation helps them avoid deficiencies that are especially difficult to detect in slower growing ruminants like bison. Plus, most North American soils are deficient in essential minerals like selenium, so fortifications are important for all grazing herds.
