## INGREDIENTS

Dried Bacillus Subtilis Fermentation Product, Dried Enterococcus Faecium Fermentation Product, Yeast Extract, and Hydrated Sodium Calcium Alumino Silicate.

## TESTIMONIALS

“ I gave this to 4 bottle babies. One I didn't think would make it through the night. Drenched her with first month, milk replacer and electrolytes. She was good as new in the morning. I've been giving as directed and all calves are healthy and growing well. -Melissa

Had a set of twins born on a Saturday. Received First Month on Thursday...those calves did great on this product. Beautiful coats and tons of energy. And no scours. Highly recommend. -Rhonda L.

We have 6 beef bottle calves and I started them on this right a way and have found that they do not get the runs! Love it!! There coats look better than the bottle calves from last year. I will be ordering again. Thanks for a great product. -Ellen C.

”

## FREQUENTLY ASKED QUESTIONS

### HOW LONG SHOULD I USE FIRST MONTH?

You should use First Month for at least 1 month; 2 months is beneficial. This gets your calves past their most vulnerable health period and on their way to healthy growth into adulthood. For every 1lb of dry matter intake in the first 2 months of life, there are 18 more pounds of milk intake during the first lactation phase.

### HOW MUCH DOES FIRST MONTH COST?

Depending on location and shipping costs, First Month usually costs around \$8-9 per calf in the first month of use

## RECOMMENDED FEEDING RATES:

### calves

4 grams per feeding  
8 grams per day (2 doses)

### lambs + kids

2 grams per head per day  
divided among feedings

## Milk mixing instructions

1. Measure 2 qts of milk
2. Add 1 tsp (about 4 grams) First Month
3. Mix thoroughly
4. Feed to calf
5. Reduce measurements by half for lambs + kids

## Replacer instructions

1. Add 1 quart of water
2. Add preferred dry milk replacer and mix lightly
3. Mix in 1 tsp (about 4 grams) First Month
4. Add remaining quart of water and mix thoroughly
5. Feed to calf
6. Reduce measurements by half for lambs + kids

## Syringe instructions

Calves- 30 cc per day  
Kids + Lambs- 7 cc per day

- Can be divided into multiple feedings
- Disinfect syringe between doses
