INDIVIDUAL BUCKET

PN # 602506

UPC 758364602506

Redmond Udder Mud is a 100% natural clay rub with mint and tea tree oil that can draw heat and swelling out of the udder while increasing circulation to promote healing. Udder Rub is a rub, not a lotion - smear a generous amount on the affected area and repeat after each milking. Whether your approach is organic or conventional, Udder Mud can help you get back to what you love about raising animals instead of worrying about their health.

For all classes of  
lactating animals

dairy cows

sheep

goats

## Natural Mastitis Treatment

Redmond Udder Mud reduces swelling, relieves discomfort, and inhibits infection for all lactating animals.

## Ready and Easy to Use

Udder Mud is a pre-hydrated clay paste that rubs on easily and stays where you have applied it.

## Binds to Toxins

The bentonite (montmorillonite) clay in Udder Mud, naturally binds to toxins to promote healing and provide relief.

## Versatile for Joint Relief

Our concentrated formula includes mint, tea tree oil, and menthol; 3 ingredients that can assist with sore joints and hocks.

## Ideal for Traditional + Organic Herds

For traditional operations, Udder Mud is the perfect tool to use in conjunction with veterinarian directed antibiotic therapy. Redmond's soothing rub can provide quick relief as the antibiotics begin to work.

## Ingredients:

-  Purified Water
-  Bentonite Clay
-  Peppermint Essential Oil
-  Menthol
-  Unrefined Salt
-  Tea Tree Oil

# NATURE — HAS IT — RIGHT

“

Udder Mud pulls the edema out faster than anything I have ever used. Udder Mud is darker in color when you rub it on so you can see where you have applied it.”

– Rick T.

Udder Mud is easier to apply than the leading product that I had been using. It also stays on the udder better.

– Brad M.

Love, love, love it! Have used udder mud for 2 years on my jerseys. Does a great job on the occasional owies. We use on the teats after milking. Particularly helpful in the winter. Also use on those areas that tend to be problematic in the between the quarters on big udders.

– Laurie N.

Udder Mud rubs on well and does not fall off the udder as some other products. It then clear up much quicker than other products that I have used. Udder Mud pulls down the swelling very fast on fresh cows.”

– Larry E.
