INCLUDED IN KIT

Registration card, pre-paid first class USPS return service envelope (with tracking number), soil scoop, sample jar (with DI water and nutrient adsorbing capsule).

PRODUCT PAIRINGS

We recommend building healthy soil with Redmond Mineralyte. With 3 different tiers, your test results can direct you to what your soil needs to thrive

FREQUENTLY ASKED QUESTIONS

HOW OFTEN SHOULD I TEST?

If you are actively growing and harvesting from a plot of soil, testing every year is ideal (preferably in the fall).

If you are fallowing or resting ground between growing sessions you can test once every 2 years. Don't wait more than 3 years to test soil.

If you test in the fall, amend, and put soil to bed over the winter, then testing again in the spring can give you an idea of how well your amendments corrected the problems.

TESTIMONIALS

“

I have used the Soil Test Kit two years in a row and found it to be very helpful. First, they save the results on-line each year, so I can compare the results...As for the improvement I have witnessed, my garden this year was abundant!...the amount of produce that I am harvesting is beyond belief. My plants are fuller and healthier than ever before. By following the suggested additives to my soil, it increased my success rate by triple in just this first growing season after treating my soil last fall, before I put the garden to bed. I highly recommend everyone try this soil test kit to anyone who is having trouble with their garden.

-Sandra A.
