

REDMOND 10 FINE

PRODUCT BRIEF

Remond 10 Fine conatins our full spectrum of sea minerals and is a great place to start for any mineral program.

• REDUCE YOUR COSTS ON CUSTOM MINERAL MIXES

10 Fine has many trace minerals that livestock need. If your animals and soil experience mineral deficiencies, we can custom fortify your minerals to match your exact needs.

• NO CHEMICAL PROCESSING

Redmond 10 Fine is unrefined, OMRI Listed, and contains 0% synthetic chemicals. Whether your approach is organic or conventional, 10 Fine can help you get back to what you love about raising animals.

• PREFERRED BY LIVESTOCK

Animals instinctively crave salt that has naturally occurring trace minerals. Try it in your herd: put any salt or mineral next to Redmond 10 Fine and see which one your animals choose.

• IMPROVE SOIL HEALTH

Redmond 10 Fine's full spectrum of sea minerals can also be applied as a dry or foliar application to soil. Sea minerals can boost soil electrical conductivity, and invigorate beneficial bacteria colonies essential to soil and plant health.

PRODUCT FAQ'S

HOW DO I USE IT?

- Livestock: Offer free choice year round in loose minerals or in block form. You can also mix with feed rations.
- Soil: Apply dry (25-150 lbs per acre each year) or as a foliar spray (3.5 lbs per acre 3-4 times a year) to your land.

WHY IS REDMOND BETTER THAN HEAVY MINERAL MIXES?

Some mineral programs offer heavy doses of minerals mixed with a small amount of salt. Unfortunately heavy mineral supplements easily tip the scales too far in one direction or another. When it comes to minerals, any imbalance is unhealthy- too little is just as bad as too much. Plus, some minerals taste bitter, so heavy mineral supplements with low salt are much less palatable to your animals.
