

REDMOND FIRST MONTH CALF IMMUNE STIMULATOR

PRODUCT BRIEF

First Month is an immune stimulator for newborn calves. It contains Redmond's volcanic smectite clay, probiotics, electrolytes, and yeast derivatives.

- **REDUCES DEATH LOSSES:**
UC Davis school of veterinary medicine found that Redmond's smectite clay (used in First Month) reduced calf mortality rates by 63%.
- **NATURALLY TREAT SCOURS:**
First Month corrects loss of electrolytes, dehydration, and stripped probiotics caused by scours (diarrhea).
- **BOOSTS IMMUNE HEALTH:**
Protects calves from harmful pathogens, increases immunoglobulin levels, and strengthens beneficial bacteria.
- **RESTORES HEALTHY GUT FUNCTION:**
Protects gut lining, restores probiotics, binds to toxins, slows digestive passage rate during diarrhea).

PRODUCT FAQ'S

HOW DO I USE IT?

First Month powder mixes right into the milk you'll be feeding the calf. Mix 4 grams (1 tsp) into 2 quarts of milk or milk replacer per calf and stir thoroughly. Feed twice daily.

HOW LONG SHOULD I USE FIRST MONTH?

You should use First Month for at least 1 month; 2 months is beneficial. For every 1lb of dry matter intake in the first 2 months of life, there are 18 more pounds of milk intake during the first lactation phase.

HOW MUCH DOES IT COST?

Depending on ease of access and shipping costs, Redmond First Month will usually cost around \$8-\$9 per calf in the first month of use.
