

REDMOND GOAT MINERAL

PRODUCT BRIEF

Redmond Goat Mineral Mix is a premium trace mineral mix, specially fortified and formulated for goat health.

- **60+ TRACE MINERALS**
Redmond Goat Mineral Mix comes from an ancient sea salt deposit and has a broad spectrum of 60+ trace minerals. This foundation is fortified with selenium (30 ppm), manganese, cobalt, copper, iodine, zinc, & vitamins A, D & E.
- **PREFERRED BY LIVESTOCK**
Animals instinctively crave salt that has naturally occurring trace minerals. Try it in your herd: put any salt or mineral next to Redmond's Goat Mineral Mix and see which one your animals choose.
- **NO CHEMICAL PROCESSING**
Here at Redmond, we know that nature has it right. All of Redmond's products are unrefined. Our Goat Mineral Mix is free of fillers and dyes and undergoes no chemical processing.

PRODUCT FAQ'S

HOW DO I USE IT?

Redmond Goat Mineral Mix's granules are the perfect size for mixing in with rations or feeding free choice year round.

DOES REDMOND GOAT MINERAL HAVE DDGS?

Redmond products do not contain dried distiller grains with solubles (DDGS); they simply do not need it. According to Dr. Larry L. Berger Ph.D (Professor of Animal Nutrition, University of Illinois), "Salt is a natural carrier for trace minerals, since all farm animals have a natural appetite for salt. Because [of this], it can be used as a delivery mechanism to ensure adequate intake of less palatable nutrients and as a feed intake limiter." DDGS products require very careful moderation to ensure livestock do not eat too much, especially for smaller animals like sheep and goats.
