

REDMOND SELENIUM 90

PRODUCT BRIEF

Redmond Selenium 90 is a premium ancient mineral salt with over 60 naturally occurring essential trace minerals, and fortified with added selenium (90ppm), copper, manganese, cobalt, iodine and zinc.

- **PREVENT & CORRECT DEFICIENCIES**
Much of North American soil is low in selenium. That means grazing herds are not getting enough of this essential mineral from their normal diet. Available in block or loose minerals, Selenium 90 is fortified with additional selenium to help herds that live in deficient areas.
- **BOOST IMMUNITY**
Antioxidants, like selenium, keep excess free radicals in check and protect cells from oxidative stress. They accomplish this by neutralizing free radicals with the electron they need. Once ingested, dietary selenium also becomes incorporated into at least 25 different proteins. These selenoproteins regulate the immune system and prevent it from harmfully over-reacting.
- **IMPROVE REPRODUCTIVE HEALTH**
Supplementing trace minerals during the last trimester is extremely beneficial for mother and calf, even if they do not test as mineral deficient.

PRODUCT FAQ'S

HOW DO I USE IT?

- Offer 30 days before calving through breeding season
- Offer free choice (block or loose minerals)
- Mix in with feed rations

WHICH LIVESTOCK SPECIES CAN I OFFER IT TO?

Selenium 90 can be offered to all classes of livestock and is frequently used with cattle and sheep (follow ration instructions on packaging for each species).

HOW CAN I DETECT SELENIUM DEFICIENCIES?

Selenium deficiencies can be found in vet conducted blood tests, milk tests, and living liver biopsies. Poor reproductive and immune health are also a strong sign of deficiency for all species of livestock.
