

REDMOND SOIL TEST KIT

PRODUCT BRIEF

Redmond's Soil Test Kit, powered by MySoil, makes testing your soil simple and easy.

• FAST AND EASY TO USE

Our test successfully combines accurate soil testing technologies with an easy-to-use customer experience. With results in 6-8 days and an convenient user dashboard, testing your soil has never been easier. Your results also include amendment recommendations and application rates specific to your soil.

• SAVES YOU MONEY

By honing in on exactly what your soil needs, Redmond's soil test kit saves you from making unnecessary purchases and helps you know how much to apply so you get more bang for your buck.

• ELIMINATES GUESSWORK

Soil testing results provide you with application rates that help you apply only what is needed and fertilize in a responsible and sustainable way. Soil health is a balancing act. Applying the wrong amendments, or even overapplying the right amendments, can throw this balance off and have far reaching and long lasting effects. Misapplication and overapplication can kill off the essential microbe colonies in your soil and even cause eutrophication or "nutrient pollution."
