

REDMOND NATURAL BLOCK WITH GARLIC

PRODUCT BRIEF

Remond Natural Block With Garlic combines our full spectrum of sea minerals with the pest repelling power of garlic.

- **NATURAL PEST PREVENTION**

Repels biting pests without losing efficacy like other pest relief products

- **NO FILLERS OR CHEMICAL PROCESSING**

We don't add fillers, chemically refine, bleach, heat treat, or evaporate our products.

- **PREFERRED BY LIVESTOCK**

Our delicious salts are the perfect carrier for trace minerals. Your animals will appreciate Redmond's taste that you won't find in the heavy mineral mixes from "the other guys." Try it in with your animals: put any salt or mineral next to Redmond and see which one your animals choose.

- **FIELD PROVEN BY EXPERTS**

The Saskatchewan Department of Agriculture conducted an extensive field test on the effectiveness of garlic mineral salt for fly control. 3 herds, consisting of 150 cow/calf pairs each, were each given mineral salt, with 1 herd being fed garlic mineral salt. The garlic mineral salt group's fly count was about 55% lower than the control groups. They also noticed a lot less fly avoidance behaviors in the garlic group, whose animals were able to enjoy more time grazing and resting.

PRODUCT FAQ'S

WHEN SHOULD I USE BLOCKS VS. LOOSE?

- Provide tasty enrichment to help reduce destructive or harmful boredom behaviors
- To quickly boost your number of mineral stations for large lots or pastures
- Click [here](#) for more tips on blocks vs. loose

WILL IT TAINT MILK OR MEAT FLAVOR?

We get this question all of the time. We have never had anyone complain about a garlicky flavor in any animal that consumes 10 Fine with Garlic.
