

REDMOND IODIZED BLOCK

PRODUCT BRIEF

Remond Iodized Block

- *DELICIOUS SALTS AND TRACE MINERALS*

Redmond Iodized Block starts with our foundation of 4 delicious and essential electrolyte salts plus over 60 trace minerals harvested directly from our ancient sea deposit in Redmond, Utah.

- *FORTIFIED FOR DEFICIENT AREAS*

Redmond Iodized Block is also fortified with added 200 ppm iodine from ethylenediamine dihydriodide.

- *NO FILLERS OR CHEMICAL PROCESSING*

We don't add fillers, chemically refine, bleach, heat treat, or evaporate our products.

- *PREFERRED BY LIVESTOCK*

Our delicious salts are the perfect carrier for mineral fortifications. Your animals will appreciate Redmond's taste that you won't find in the heavy mineral mixes from "the other guys." Try it with your animals: put any salt or mineral next to Redmond and see which one your animals choose.

PRODUCT FAQ'S

WHY DOESN'T REDMOND DYE OUR BLOCKS?

To put it quite simply, they don't need it. Here at Redmond Minerals, we believe nature has it right™ and are committed to sharing the benefits of our volcanic and mineral deposit as naturally as possible. We take our stewardship of the land seriously; and since our products go from our land to yours, we only share the best nature has to offer.

WHEN SHOULD I USE BLOCKS VS. LOOSE?

- Provide tasty enrichment to help reduce destructive or harmful boredom behaviors
- To quickly boost your number of mineral stations for large lots or pastures
