

REDMOND BEEF MINERAL

PRODUCT BRIEF

Redmond Beef Mineral contains our foundational sea minerals and is fortified with added phosphorus, calcium, selenium (60ppm), magnesium, cobalt, copper, iodine, zinc and vitamins A, D, & E.

If your cattle only have access to poor quality forage and feed, our heavily fortified Beef Mineral Mix can provide much needed peace of mind.

TALKING POINTS

LOWER DAILY COSTS

Simplifies your mineral program by giving your animals their salts, trace minerals, and fortifications all in one supplement. Reduces your costs on custom heavy mineral mixes.

NO CHEMICAL PROCESSING

All of our products are unrefined. Beef mineral mix is free of fillers and dyes. Whether your approach is organic or conventional, Redmond Beef Mineral Mix can help you get back to what you love about raising animals.

AVAILABLE IN

5 LB POUCH

25 LB BAG
(coming soon)

50 LB BAG

2000 LB TOTE
(not pictured)

HOW DO I USE IT?

Offer free choice year round or mixed with feed rations for animals living under poor forage and feed conditions.

We recommend combining Redmond Beef Mineral with Redmond Conditioner to take your mineral program to the next level.

WHY IS REDMOND BETTER THAN HEAVY MINERAL MIXES?

Some mineral programs offer heavy doses of minerals mixed with a small amount of salt. Unfortunately with heavy mineral supplements, you can easily tip the scales too far in one direction or another. When it comes to minerals, any imbalance is unhealthy--too little is just as bad as too much. Plus, some minerals taste bitter, so supplements with heavy minerals and low salt are much less palatable to your cattle. Why make your job harder than it needs to be?
