INGREDIENTS

Ancient mineral sea salt with complex chlorides (sodium chloride, magnesium chloride, potassium chloride, calcium chloride)

TESTIMONIALS

“ This product is Amazing. The night before the snow storm I sprinkled a small amount on the sidewalk and driveway. We got about 7 inches of snow. I was able to shovel the snow quickly and it melted everything rapidly. I am very impressed with this ice melt. My neighbors on both sides asked what I used. There is a significant difference in our sidewalk and drive ways. 24 hours after the storm my driveway and sidewalk is completely clear, as if it didn't snow. -Amazon 5 Star Review

This salt is fantastic! It cuts through ice and adds instant traction. We purchased as a safer option for our pups. This product works a lot better than the little blue bead type - which bounce and roll away. This product is applied more like sand, so it is placed where you want it!

”

FREQUENTLY ASKED QUESTIONS

IS IT SAFE FOR KIDS AND PETS?

Yes! Nature's Blend is an all natural mineral salt that is safe to use with kids and pets. Do not worry about ingestion at all, but remember repeated exposure to salt can dry out soft tissues like paws and hands, so wiping paws and rinsing hands during the winter is always a good idea.

HOW MUCH WILL 1 BAG COVER?

Nature's Blend melts more, with less. A 10lb bag will cover 400 square feet.

WILL IT STAIN MY CONCRETE OR CARPET?

Nope, no dyes here! The reddish color you see in Nature's Blend is from its natural mineral content. It cleans up and washes away without staining.

RECOMMENDED APPLICATION INSTRUCTIONS:

Remove loose snow and ice

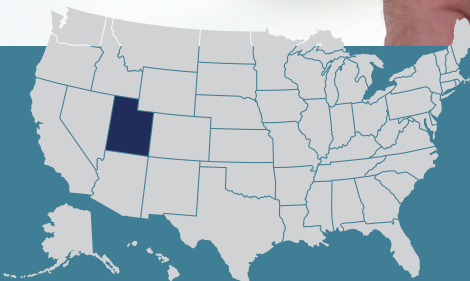

By hand, or with a scoop, distribute 2-4 ounces of Nature's Blend per square yard

Give ice melt time to penetrate and break the bond of the ice. The time will vary with weather conditions.

After the bond breaks, shovel off the leftover ice.

If more ice and snow are on their way, sprinkle a light layer over paved surfaces before snow accumulates

No two storms are the same, so experimentation will help you find the best application rate for your home
