

Mineralyte

Nature has it right™

What Makes Mineralyte Special?

SEA MINERALS

Full spectrum of sea minerals from our ancient sea deposit in central Utah

BIO AVAILABLE HUMATES

VOLCANIC ASH

Weathered volcanic ash conditioner from our ancient deposit in central Utah

POULTRY MANURE

Available in Mineralyte Grow

Mineralyte Foundation:

5 lb Pouch

PN # 113323

UPC 758364113323

25 lb Bag

PN # 113330

UPC 758364113330

Mineralyte Soil Foundation is a mineral based amendment that naturally improves the fertility of your soil to grow healthier, more productive, and more nutrient dense plants.

Mineralyte Build:

8 lb Pouch

PN # 116294

UPC 758364116294

25 lb Bag

PN # 120048

UPC 758364120048

2000 lb Tote

PN # 116065

UPC 758364116065

Fortify your soil with all the ingredients of Foundation plus more volcanic minerals higher in Sulfur, Potassium, and Calcium. Mineralyte Build can be used in combination with your preferred manure or compost.

Mineralyte Grow:

8 lb Pouch

PN # 116249

UPC 758364116249

25 lb Bag

PN # 120277

UPC 758364120277

2000 lb Tote

PN # 116089

UPC 758364116089

Mineralyte Grow contains poultry manure to provide a boost in nitrogen and organic matter to feed plant uptake. It should be used when you HAVE NOT already applied manure, compost, or other carbon to your soil.

Improves Soil Quality

Naturally improves soil structure, texture, and composition. Conditions your soil to improve drainage and respiration around roots and create a better environment for your soil's ecosystem.

Boosts Electrical Conductivity

Contains an expansive profile of sea minerals from our unique ancient sea deposit in central Utah. These sea minerals boost the electrical conductivity (EC) levels in your soil and invigorate the complex biological and chemical highway system your plants rely on.

Sparks Soil Ecosystem

Mineralyte stimulates and supports the organisms that feed, metabolize, and release nutrients into your soil. Without this food web, soil-based nutrients would just sit there, bound up in molecules that plants cannot use.

Builds Nutrient Storage

Mineralyte creates a healthier soil ecosystem, which means more organic matter to fertilize your plants. Mineralyte also increases your soil's CEC levels (cation exchange capacity) and creates a storage of nutrients that your plants can exchange and trade for what they need.

CHEMICAL FERTILIZERS**

Mineralyte Typical Analysis

	FOUNDATION	BUILD	GROW
Nitrogen			1.4 %
Phosphorus	0.02 %		1.4 %
Potassium	2 %	5.6 %	2.1 %
Calcium	2 %	1.7 %	3.5 %
Magnesium	0.43 %	0.3 %	0.4 %
Sulfur	0.07 %	13 %	5.1 %
Iron		0.2 %	0.2 %
Salt	46 %	29.9 %	16.1 %
Manganese	200 ppm	130 ppm	70 ppm
Zinc	17 ppm	11.1 ppm	6 ppm
+ 60 other trace minerals			

How to Use Mineralyte

FOUNDATION

Use for moderate quality soil that needs a boost in microbial activity

- One five pound pouch will cover 250 sq ft, or 1 cup per 30 sq ft.
- Once a year, top dress or lightly incorporate directly on the soil.
- We recommend using in early spring.
- For best results, water after application.

BUILD

Use with your own homegrown manure or compost

- One eight pound pouch will cover 640 sq ft, or 1 cup per 50 sq ft.
- Once a year, top dress or lightly incorporate directly on the soil.
- We recommend using in early spring.
- For best results, water after application.

GROW

Use by itself, contains its own manure/compost

- One eight pound pouch will cover 400 sq ft or 1 cup per 30 sq ft.
- Once a year, top dress or lightly incorporate directly on the soil.
- We recommend using in early spring.
- For best results, water after application.

ACRE APPLICATION RATES

FOUNDATION	200 lbs per acre
BUILD	300 lbs per acre
GROW	300-400 lbs per acre
