

REDMOND CONDITIONER

improves profits and reduces death losses in pigs

Nature has it right™

Since the 1950s, thousands of customers and millions of animals have used Redmond Minerals and never looked back. Switching to Redmond is a small shift that makes a huge difference.

Introduction

The all natural, sodium bentonite clay in Redmond Conditioner is a tried and tested livestock supplement with many health benefits: *buffers gut acid, binds toxins, regulates digestive passage, increases feed efficiency, improves digestion.*

Objective

To determine if the feeding of Redmond Conditioner improves the health and performance of conventionally fed pigs

Procedures

2800 pigs were divided into 2 groups (Control group and Redmond group). Both groups were fed the same ration from birth to harvest (over 160 days).

Control Group: normal feed rations

Redmond Group: normal feed rations + 20 lbs/ton Redmond Conditioner

- Volcanic minerals from weathered sodium bentonite ash deposit in Redmond, Utah.

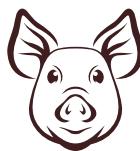

Results*

DEATH LOSSES (CULLS, MORTALITY, AND CONDEMNNS)

	CULL	MORTALITY %	CONDEMNNS
Control	10.5 %	9 %	185
Redmond	2.3%	5.3 %	1

NET PROFIT

Redmond group over Control
(after all costs)

*Data Source: Son-D Farms, Iowa

\$8.32
per pig

Conclusion

The Redmond group experienced lower death losses through culls, mortality rates, and condemns. The addition of Redmond Conditioner to the pigs' feed also significantly improved net profit production.
