

REDMOND SELENIUM 90

PRODUCT BRIEF

Redmond Selenium 90 contains our foundational sea minerals and is fortified with added selenium (90ppm), copper, manganese, cobalt, iodine and zinc.

Much of North American soil is low in selenium. That means grazing herds are not getting enough of this essential mineral from their normal diet. Available in block or loose minerals, Selenium 90 is fortified to help herds that live in deficient areas.

TALKING POINTS

LOWER DAILY COSTS

Simplifies your mineral program by giving your animals their salts, trace minerals, and fortifications all in one supplement. Reduces your costs on custom heavy mineral mixes.

BOOST IMMUNITY

Antioxidants, like selenium, keep excess free radicals in check and protect cells from oxidative stress. They do this by neutralizing free radicals with the electron they need. Once ingested, dietary selenium also becomes incorporated into at least 25 different proteins. These selenoproteins regulate the immune system and prevent it from harmfully over-reacting.

IMPROVE REPRODUCTIVE HEALTH

Supplementing with extra trace minerals during the last trimester is extremely beneficial for mother and calf, even if they do not test as mineral deficient.

AVAILABLE IN

5 LB POUCH

25 LB BAG (coming soon)

50 LB BAG

44 LB BLOCK

2000 LB TOTE
(not pictured)

HOW DO I USE IT?

Offer 30 days before calving through breeding season, offer free choice (block or loose minerals), or mix in with feed rations

We recommend combining Redmond Selenium 90 with Redmond Conditioner to take your mineral program to the next level.

WHICH SPECIES CAN EAT SELENIUM 90?

Selenium 90 can be offered to all classes of livestock and is frequently used with cattle and sheep (follow ration instructions on packaging for each species).

HOW CAN I TELL IF MY ANIMALS ARE SELENIUM DEFICIENT?

Selenium deficiencies can be found in vet conducted blood tests, milk tests, and living liver biopsies. Poor reproductive and immune health are also a strong sign of deficiency for all species of livestock.
