

# REDMOND SHEEP MINERAL

## PRODUCT BRIEF

Redmond Sheep Mineral is a premium, ancient sea salt with naturally occurring essential trace minerals. This mix is also fortified with vitamins A, D, & E.

We work with nature's balance and proportion to supply your flock with the essential minerals they crave.

Redmond Sheep Mineral is free from the fillers and processed byproducts your sheep don't want or need. Instead of using these additives, Redmond Sheep Mineral works with their instinctual cravings for salty electrolytes to deliver vitamins and minerals that help them naturally balance their copper absorption. They love it, and you will love the results.

## TALKING POINTS

### HEALTHY COPPER LEVELS

Redmond Sheep Mineral provides your flock with the essential minerals they need and is fortified with vitamins A, D, & E. Sheep Mineral also contains safe, naturally occurring, minimal levels of copper that is essential for bone formation, wool growth, immune health, nerve function, and more. In addition, the sulfur, zinc, and iron in Redmond Sheep Mineral work together to help regulate healthy copper absorption.

### NO FILLERS, NO FUNNY STUFF

Don't pay for fillers your sheep don't need. Other mineral mixes are not palatable without processed grain byproducts or molasses to get them to eat it. Redmond Sheep Mineral delivers minerals just as nature intended. They love it, and you will love the results.

### PREFERRED BY LIVESTOCK

Animals instinctively crave salt that has naturally occurring trace minerals. Try it in your herd: put any salt or mineral rock next to Redmond's Sheep Mineral and see which one your animals choose.

### HOW DO I USE IT?

Provide Redmond Sheep Mineral free choice. If you prefer feed mixing, add 1/4 oz (2 tsp) per sheep per day, or follow the guidelines from your vet or nutritionist.

We recommend combining Redmond Sheep Mineral with Redmond Conditioner to take your mineral program to the next level

[Learn more about Redmond Conditioner](#)

### HOW MUCH COPPER CAN MY SHEEP HAVE?

According to the OVC, sheep need around 5-10 parts per million (ppm) of dietary copper. It is important to note that copper needs can vary depending upon the breed and life stage of your sheep. Consult your veterinarian to ensure you are meeting the specific requirements of your herd.
